We should all be happy that Jim Brown quickly discovered that the new release was not placing files in the hierarchy it should. I apparently broke that when I made the mods related to the millisecond compatible file names. Now that I have spun this into a good thing that happened before you needed to move very many misplaced folders, I present you this shiny new version of RSS.

Hi all,

The SUG site has been updated to include recently submitted observing reports from Andy (a slew of 'em!) and Jim (the recent Io-B).

Thanks Jim and Andy for making these reports, they look great!
