To: "radiojove@lists.nasa.gov" <radiojove@lists.nasa.gov>

An update is available for Radio-Sky Spectrograph (RSS) . This update addresses a bug in the title bars and includes a new RTL Bridge version for use with RTL dongles.

http://radiosky.com/spec/Spectrograph_Update_2_4_11.exe

If you do not currently have RSS you can download it here:

<http://radiosky.com/spec/Spectrograph.exe>

This program is free and will allow you to view some of the spectacular (so-to-speak) images that you may have been seeing in the radiojove-data list. Windows only.
