Hi Dave,

I have uploaded the RSS installation with the new files that you found missing. Thank you again for pointing out the problem and the solution. If anyone out there could not get RTL Bridge to run because of a missing pthreadVC2-w32.dll or msvcr100.dll , they are in the new installation package ready for download.

<http://radiosky.com/spec/Spectrograph.exe> for the full install or  
[http://radiosky.com/spec/Spectrograph\\_Update\\_2\\_4\\_8.exe](http://radiosky.com/spec/Spectrograph_Update_2_4_8.exe) if you already have RSS installed and just want to update to RTL Bridge.

Jim,

It took me two attempts, but I finally got the RTL bridge to work with the NooElec R820T SDR.

It failed at first saying that I needed pthreadVC2-w32.dll - I found that on <http://www.rtl-sdr.com/tag/dump1090/>, and copied it into the Program Files/Spectrograph/rtl-sdr-release/x32 directory. After that, RTL bridge worked, and then I fired up RSS, and that worked fine!

Thanks for incorporating the dongle - what a boon for us dongle owners! (I still plan on using the Radio Jove receiver, but this will supplement it nicely).
