To: radio-jove@groups.io

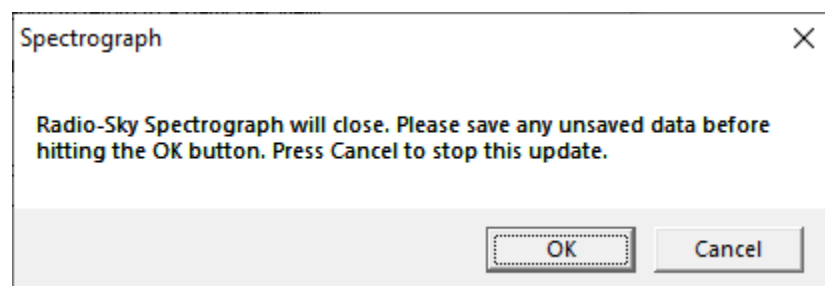

Version 2.9.70 has been released. It has a number of fixes and improvements.

Let's see if we can do the installation of the update more programmatically. I tried to make this as easy as possible. If it doesn't work let me know.

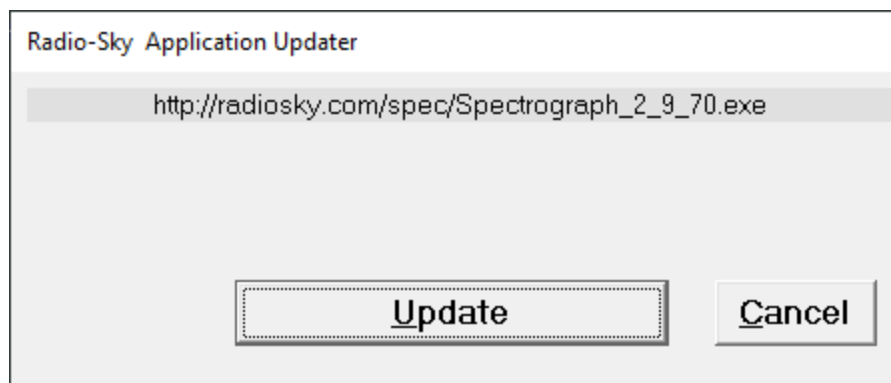

In **RSS** click on *Help / Check for Updates*.

Scroll down until you see the update exe URL and double click on it.

Click **OK**.

Click the **Update** button and RSS should close and the installer downloads and runs the new installation file.

If it fails to work for you can install it manually from

http://radiosky.com/spec/Spectrograph_2_9_70.exe
