Jim,
I tried several section file saving and even for one hour I can't get 70 to even show the section instead when I click on apply it goes to a green screen. It's pretty but I've never seen that before. Seems to work otherwise though.

Larry

Jim,
I went ahead and did the update as you described. It stopped installing (Said McAfee Framework needs to be stopped) because I have McAfee VPN installed and I couldn't get it stopped as it said access denied. So I stopped all McAfee services I could and went back to the RSS install and selected ignore and RSS 70 installed and
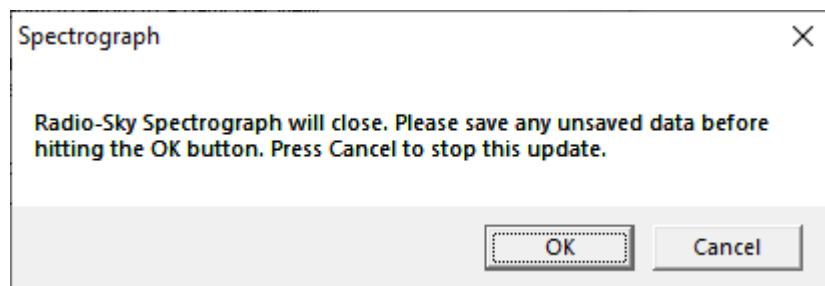

it is working. I'll do a reboot just to make sure all is OK. Thanks, Jim. I'll check the file section saving eventually. Larry

Version 2.9.70 has been released. It has a number of fixes and improvements.

Let's see if we can do the installation of the update more programmatically. I tried to make this as easy as possible. If it doesn't work let me know.
In **RSS** click on *Help / Check for Updates.*

Scroll down until you see the update exe URL and double click on it.

Click *OK.*

Radio-Sky Application Updater

http://radiosky.com/spec/Spectrograph_2_9_70.exe

[**U**pdate] [**C**ancel]

Click the **Update** button and RSS should close and the installer downloads and runs the new installation file.

If it fails to work for you can install it manually from

http://radiosky.com/spec/Spectrograph_2_9_70.exe
